

# Ujala Agarwal

## AWS SERVERLESS DEVELOPER | CLOUD AND BACKEND ENGINEER

Bareilly, Uttar Pradesh | +91 7906786403 | agarwalujala3@gmail.com  
Portfolio: Ujala OS live mirror | GitHub: github.com/agarwalujala3-lang | LinkedIn: linkedin.com/in/ujala-agarwal-30aa28283

### PROFESSIONAL SUMMARY

Cloud-focused engineer building GitHub-backed AWS workflows with Lambda, S3, DynamoDB, API Gateway, Cognito, Textract, IAM, and CloudFront. Strong at connecting identity, storage, processing, API layers, and frontend delivery into usable product workflows with clear service boundaries.

### TECHNICAL SKILLS

|                  |                                                                                    |
|------------------|------------------------------------------------------------------------------------|
| AWS Cloud:       | Lambda, S3, DynamoDB, API Gateway, IAM, Rekognition, Textract, CloudFront, Cognito |
| Languages:       | Java, JavaScript, C                                                                |
| Backend and Web: | Node.js, Express, HTML, CSS, REST APIs                                             |
| Databases:       | DynamoDB, MySQL                                                                    |
| Tools:           | Git, GitHub, Docker Basics, OpenAI API, Mermaid                                    |

### CORE STRENGTHS

- Designs serverless workflows around identity, upload paths, processing, persistence, and API access.
- Turns cloud services into usable product flows instead of isolated infrastructure demos.
- Documents live links, repos, and project tradeoffs so cloud work is easy to verify.

### EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| CETPA Infotech Pvt. Ltd.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | June 2025 - August 2025 |
| Cloud Computing Intern   Noida, Uttar Pradesh                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                         |
| <ul style="list-style-type: none"><li>• Built practical AWS service-integration experience across Lambda, S3, DynamoDB, API Gateway, IAM, and Rekognition while supporting cloud application workflows.</li><li>• Developed and tested serverless backend processes and automation flows, reducing manual intervention by approximately 40-50%.</li><li>• Practiced deployment basics, service boundaries, and debugging habits needed to move cloud workflows from concept to usable delivery.</li></ul> |                         |

### PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |        |

### EDUCATION

**Shri Ram Murti Smarak College of Engineering and Technology**  
**Bachelor of Science in Computer Science | Bareilly, Uttar Pradesh**

Completed May 2026

## **CERTIFICATIONS AND TRAINING**

---

- Cloud Computing Internship Completion Certificate - CETPA Infotech Pvt. Ltd.
- IBM Introduction to Large Language Models
- IBM Getting Started with Artificial Intelligence
- IBM SkillsBuild AI Campus Connect Bootcamp - Capstone Project Participant
